

E. Charles Beliveau, D.D.S., PLLC

Cosmetic & Family Dentistry

987 Osgood St.
North Andover, MA 01845

Office Hours By Appointment

Welcome to our practice and thank you for choosing us as your dental care provider.

We think you'll find us a little different in small, but important ways. First, we will involve you – depend on you, actually, during the course of your treatment. Dental health is a team enterprise with one collective goal—nurturing your teeth, mouth and gums to simply be the best they can be. Dental technology has come a long way.

Preventive dentistry is our goal for every patient. It involves the daily care, good nutrition, and periodic check-ups and cleanings that maintain good dental health already achieved. Preventive dentistry may not be where we start with every patient, but it's where we like to finish.

Restorative dentistry is basic repair of the mouth. We mend broken or leaking fillings, build crowns and bridges, fit partial and full dentures, realign your bite. Where necessary, gum disease is treated, or root canal therapy recommended. The prevailing belief behind restorative dentistry is a simple one: you can keep all your teeth for all your life.

Cosmetic dentistry is coming of age with new materials and procedures that make a beautiful smile accessible to everyone. Because our preventative and restorative programs have been so successful, we now have the luxury of considering cosmetic treatment for gaps, chips and otherwise less-than-perfect smiles.

Please take a moment to review and complete the enclosed forms. We request that you bring them with you to your first appointment, as well as your current dental insurance card to ensure correct processing of your dental claims. If you have any questions about your treatment, or any other concerns, we always take the time to discuss them with you. You can relax and feel good about your visits with us.

Again, welcome.

Sincerely,

E. Charles Beliveau, D.D.S.
